

*One powerful software solution
for all your work, health and
safety needs*

THE FIGTREE ADVANTAGE | SAFETY MANAGEMENT

Figtree Systems safety software is designed to take the difficulty out of safety management, making it easier for employees and safety managers to report on and coordinate their work health and safety activities online.

Figtree Systems' safety software package covers all aspects of an effective and compliant safety management system. Our highly configurable cloud-based application helps remove reliance on paper-based business processes, improve compliance, reduce incidents and streamline OHS / WHS reporting.

***Manage workplace safety responsibilities anytime,
from anywhere, on any device.***

The product is modelled around ISO 45001 and ISO 31000 standards and caters to a full suite of safety management requirements, including a suite of integrated modules for hazard management, incident management, risk management, injury management, audits and inspections, and contractor management.

CENTRALISING ALL SAFETY DATA

ABOUT US

Figtree systems has over 3 decades of experience as a trusted provider of highly configurable, off the shelf software services for insurance claims and risk management. Figtree systems has helped hundreds of organisations around the globe, delivering and supporting software for insurance claims management, policy management, work health safety, risk management and fleet and asset management.
